CORK PRODUCTS

ONE-STOP BRAND FOR ALL TRANSFORMER SEALING & ALLIED PRODUCTS

Nu-Cork has more than **30 years of experience** and established leadership in the industry to meet the ever-increasing demand of global markets. We can produce, supply and export a wide range of high quality of **Rubberized Cork Sheets, Strips, Gaskets and Anti-Vibration Pads**

Nu-Cork produces premium **rubberized** cork gaskets because of unmatched quality, performance, and efficiency. To ensure long-term performance, we use cutting-edge technology and strictly adhere to industry standards **at the time of** manufacturing.

CORK USES

- Cork rubber is widely utilized in industrial and commercial applications due to its flexibility and resistance to oils, gasoline and other chemicals.
- Our bespoke gasket experts can assist you in what cork and rubber material would be optimum for your applications.

CORK'S ADVANTAGES

- User friendly design
- Fire-resistant and viable insulator
- Extraordinarily durable and unaffected by extreme weather
- Anti-Vibration behaviour
- Seepage-resistant
- Light and buoyant
- Everlasting material

GASKETS FOR TRANSFORMERS

- Since transformer designs differ by manufacturers, Nu-Cork offers both individual transformer gaskets and whole kits including all the gaskets required for a transformer of a specific rating. These transformer gaskets can be customized to match personalized specifications.

AUTOMOBILE SEALS

- Nu-Cork offers gaskets for valve covers, oil sumps and radiator. Because of our tools and manufacturing expertise we can produce large and small volumes without incurring additional setup expenditures.
- Along with our broad selection of gaskets for Engine and Transmission applications, customers can have gaskets made to their precise specifications, requirements and drawings.
