## Trusted Name In Sealing

-60°C To +260°C

## INFLATABLE PRODUCTS

ONE-STOP BRAND FOR ALL TRANSFORMER SEALING & ALLIED PRODUCTS

**NU-CORK, one of the prominent names in the industry, have launched Oil/Water/Gas Storage Balloon for Pyrolysis in it's range of product which will be manufactured at our Bhiwadi Plant, Rajasthan, India.**

This Balloon is a collapsible, intermediates storage tank for any industrial Gas prior to bottling under pressure. These Balloons also replace conventional metal tank, currently used as intermediate storage. Gas Holder Balloon is fabricated out of high tenacity polyamide fabric matrix, impregnated with compatible polymer on the inside for the gas stored and on the outside with Neoprene for weather abrasion and UV resistance.

GASHOLDER BALLOON CAN BE USED FOR THE STORAGE OF

- Nitrogen (N<sub>2</sub>)
- Oxygen (O<sub>2</sub>)
- Carbon dioxide (CO<sub>2</sub>)

#### ADVANTAGES

- Self-supporting
- Self-rising
- Flexible
- Collapsible
- Fully customised
- Cost-effective
- Environment friendly
- Long service life
- Quick and easy deployment
- No outside pollution
- Constant volume
- No evaporation

Such tanks are perfect solution for permanent or temporary storage of raw water, sanitary water, rain water & other fluids. Designed to any shape and size.
