INSULATING PRESS BOARD AND PAPER

ONE-STOP BRAND FOR ALL TRANSFORMER SEALING & ALLIED PRODUCTS

NU-CORK

Nu-Cork is ahead than all others in the Marketing and Export of Insulating Pre-Compressed pressboards, Kraft and Crepe papers, Semi-conductive tapes, DDP and various kinds of paper. These items are made in India and are superior in quality and durability.

We offer a complete solutions for Insulating Pre-Compressed pressboards, which are used in various types of transformers. We provide these pre-compressed boards and papers as per clients' specifications throughout the world. These are created with high-quality raw materials and are available in a variety of specifications.

CHARACTERISTICS

The following are the salient characteristics:

- Produced with an intermittent board machine and ultra-pure unbleached softwood sulphate pulp
- Simultaneous pressing and drying of the wet board to produce a board with high dimensional stability and electrical and mechanical strength.

APPLICATION AREA

Widely used as an insulating material in:

- Power and Distribution Transformers
- Current/Potential Transformers (CT/PTs)
- Spacers
- Keyways
- Strips, etc.
- Ideally suited for the fabrication of machined components such as radial and axial spacers.
